

GenieConnect

Syncing Machine HD Treatment Data to RenalGenie

REDUCE ADMIN WORK, ELIMINATE MANUAL ENTRY

Auto-capture HD treatment data

Automatically record Blood Flow(QB), Blood Pressure, UF, KT/V, treatment time and other dialysis machine outputs. – no manual entry required.

Real-time sync to RenalGenie

Seamlessly transfer dialysis treatment readings into RenalGenie through secure cloud integration

Boost nursing efficiency

Remove manual entries with dialysis data auto-mapped to patient records

Universal compatibility

Integrates with leading dialysis machines – **Baxter, B. Braun, Nipro, Dora**, and more to come

Device Monitoring & Alerts

Dashboard visibility with live status updates and alerts, ensuring every GenieConnect unit stays in check.

Secure & compliant data transfer

All treatment data is encrypted and auditable, ensuring safe, reliable records.
